

TOOL-PARTNERSHIPS

Solutions, not just licences!

Software Quality Lab has extensive expertise in the selection, use, adjustment and integration of different tools in the development process.

We provide you with more than just licences. We provide help with knowledge of processes and methods and implement processes and methods appropriately in the software tools.

Tool Partner

We have partnerships with the following manufacturers and you can buy these products via Software Quality Lab:

Borland

We are not a typical software vendor, we offer complete solutions from one source.

Our requirement is to integrate and automate your development processes via one or several of the tools named above or with other fitting tools and thus cause an increase in efficiency.

Requirement analysis

- Predefined check lists
- Processes
- Functional
- Non-functional

Tool selection & procurement

- Pre-selection
- Value analysisProof of concept
- Decision and procurement

Detail analysis

- Requirements
- Work processes
- Interfaces
- Based on the chosen tool

Tool adjustment

- GUI configuration
- Reporting
- Workflow settings
- Interface adjustment

Integration

- Data exchange between tools
- Overlapping workflows
- Process automation via Lifecycle

Installation

- Prepare runtime environment
- Tool installation
- Integration into existing environment
- Trial run for real time operation

Training

- Training plan
- Individual draft
- Communication concept
- Adjusted to tools/workflows

Go-Live & Roll-Out

- Introduction plan for pilot group
- Adjustment to procedure and tools
- Widening to all users
- Documentation

Managed Services

- Operating assistance & support
- Preventive maintenance & updates
- Monitoring & reporting
- Professional tool management

The Software Quality Lab Tool Selection and Introduction Process
